

Following their excellent A level results, our former Year 13 students will soon be embarking on the next stages of their lives at university, on degree apprenticeships, on gap years or in employment.

The most popular university destinations for CCHS students are all leading universities. This year our most popular destination is the University of Exeter, closely followed by the Universities of Birmingham, Leeds, East Anglia, Manchester and King's College in the University of London. These institutions will between them be welcoming 55 students from CCHS. We are delighted with the range of institutions to which our students have been admitted, including those which are extraordinarily competitive such as the University of Cambridge, the University of Oxford, University College London and the London School of Economics.

Our former students have elected to study a wide range of courses at their chosen universities. The most popular single choice is Medicine – eighteen students will be reading this – followed by English Literature (either on its own or as part of a joint degree) with eleven students, Law with nine, Mathematics with eight and Economics with seven. Beyond these popular choices the range of courses is wide and includes Acting, Aerospace Engineering, Archaeology, Architecture, Biochemistry, Biological Sciences, Biology, Biomedical Science, Bioveterinary Sciences, Business and Management with Industrial Experience, Business Management, Chemistry, Civil Engineering, Classics with Study Abroad, Computer Science, Criminology, Data Science, Dental Surgery, Drama, Ecology and Conservation with a Year in Professional Practice, Electronic and Electrical Engineering, Environmental Science, Fashion Marketing, Geography, Geology, Global Health and Social Medicine, Global Law, History and Economics, International History and Politics, International Management, Marketing, Mechanical Engineering, Medical Science, Medicinal and Pharmaceutical Chemistry (with placement year), Midwifery, Modern and Medieval Languages, Modern Languages, Natural Sciences, Pharmacy, Philosophy, Philosophy and Politics, Politics and International Relations, Politics and Spanish, Politics, Philosophy and Economics with Study Abroad, Psychology, Psychology, Psychology, Psychology, Social Sciences, Sociology, Spanish, Theatre and Chinese Studies and Zoology. Students are also taking up prestigious and competitive Degree Apprenticeships in areas including both Law and Accountancy.

We wish all our former students well for the future. The universities they will be attending will be fortunate to welcome them and to work with them. Many thanks in particular to Mrs Hopkins, our Higher Education Adviser, for the excellent support she provides to our senior students.
