

Press Release

9th September 2026

Chelmsford County High School for Girls has been awarded Isaac Science Embedded School status at Bronze level for 2026-2027.

Chelmsford County High School for Girls has been awarded Isaac Science Embedded School status at Bronze level for 2026-2027.

Isaac Science is a project funded by the University of Cambridge and supported by the Ogden Trust. It aims to empower all students through free access to high-quality science learning resources, irrespective of location, background, school or environment.

The Isaac Science Embedded School Award recognises schools in which teachers have regularly set Isaac Science assignments to students throughout the previous academic year. Through regular use of Isaac Science's problem-solving questions, students develop the scientific and mathematical reasoning skills required for university study and academic success.

Stephen Lawlor, Headteacher at Chelmsford County High School for Girls, said: "This award is testament to the academic strength of our students and the hard work and commitment of our amazing staff. A particular mention must go to Mrs Kurian, who leads on our STEM projects with vision and success. Many congratulations to all involved on achieving this notable award. Thank you to Isaac Science for providing these excellent opportunities for school communities."

Isaac Science Embedded Schools are encouraged to:

- embed Isaac Science in the Science scheme of work;
- engage with Isaac Science Teacher CPD and events for students and teachers; and
- support other schools through events and training.
