INTERNAL SCRUTINY PROGRAMME

To effectively manage and monitor your risk and resources

Internal scrutiny in an education setting is a requirement for academy trusts. The Academy Trust Handbook states this programme should cover financial and non-financial areas. Its purpose “is to provide your board (and ESFA) with assurance that the trusts system of internal control is effective and contributes to strong governance, risk management and control arrangements at the trust.”

Juniper’s internal scrutiny programme provides independent assurance to the board that it’s financial and non-financial controls and risk management procedures are operating effectively. Juniper aims to work with the trust and the board to ensure that the audit meets the requirements required to review the risks identified.

Our team here at Juniper comprises of professionally qualified experts from across all areas of an educational setting, and therefore we can offer a breadth of internal scrutiny that covers everything from banking and payroll to safeguarding, health and safety and curriculum.

THE PROCESS

Your audit committee has the responsibility for defining the scope of your internal scrutiny programme. You will see a list of areas available for review below. This document contains a blank template that you can use with your board to plan your internal scrutiny. The scoping exercise needs to consider the structure of the trust and the level of centralised processes, whilst keeping in mind your trust's approach to risk management. We are happy to discuss scoping options with you if required. Your scope will be flexible depending on your changing risk profile and the outcomes of the reviews that take place. You will receive a report following each review that your audit committee can use to inform further scrutiny and arising action plans. Once all reviews are complete, you will also receive an annual trustee summary report which can be submitted to the ESFA.
