

Analysis of GCSE TAG results against CAT, CEM and Midyis

November 2021

Executive Summary

- Analysis of Midyis, CAT and CEM indicate a positive correlation between Average GCSE TAG and the external data held for these students.
- The correlation for Midyis, CAT and CEM are nearly identical with correlation coefficients of 0.35, 0.31 and 0.26 respectively, these figures are lower than observed in previous years. This is likely to be due to the significant impact of external factors due to the pandemic.
